

Figure S1. Plant-pollinator interaction rarefaction curves for each week in each year of the study. Rarefaction analyses were conducted in R using the package *vegan* (following Gotelli & Colwell 2001). Dotted lines indicate the estimated interaction richness according to the ACE estimator (abundance-based coverage estimator; Chao & Lee 1992). Grey shading indicates 95% confidence interval. See Table S2 for references.
